RECENT PROJECTS

Clumsy Messenger App - Real time messaging app

- Technologies used: React, Node, Express, Rest API, MongoDB, Socket.IO, Redux
- Divided into two parts

1. Clumsy-Messenger-API

- RESTful API built with endpoints for authentication, database management and handling realtime socket connection.
- Uses passport for authentication and cookies to maintain session.
- Live: <https://clumsy-messenger.herokuapp.com/>
- Repo: <https://github.com/Clumsynite/clumsy-messenger-api>

2. Clumsy-Messenger-App

- Frontend built to read, send messages.
- Uses react as frontend framework, and socket.IO for connection handling.
- Shows users' online status and realtime messages.
- Live: <https://clumsynite.github.io/blog-read/>
- Repo: <https://github.com/Clumsynite/clumsy-messenger-app>

Bank System App - CRUD App

- Technologies used VueJS, Node, Express, Bootstrap, Pug and mongoDB, MySQL
- Built in order to simulate bank transactions between a banker and customer

1. Bank-System-API

- RESTful API built with endpoints for authentication, database management using MySQL (knex)
- Live: <https://bank-system-api.herokuapp.com/>
- Repo: <http://github.com/clumsynite/bank-system-api>

2. Bank-System-App

- Frontend built to create and manage transactions.
- Uses VueJS for frontend
- Live: <https://bank-system-app.netlify.app/>
- Repo: <http://github.com/clumsynite/bank-system-app>

WORK EXPERIENCE

– Tidalwave Technologies | Mumbai, IN

Jan 2021 - Current

Web Developer Intern

LANGUAGES
