WORK PROJECTS

DDFN – Fefifo

- A system built to help with the goal of making farming easier for farmers.
- Built for 2 frontend platforms. React Website and React Native for Mobile App.
- Tech Stack: *ReactJS, React Native, KoaJS*
- Database: *CouchDB, PouchDB, ArangoDB*

RECENT PERSONAL PROJECT

Flutter Chat App – Real time messaging app

- Technologies used: Flutter, Node, Express, Rest API, MongoDB, Socket.IO
- Divided into two parts

1. Flutter-Chat-API

- RESTful API built with endpoints for authentication, database management and handling realtime socket connection.
- Uses jwt for authentication and security.
- Uses Socket.IO to handle real time messaging
- Repo: <https://github.com/Clumsynite/flutter-chat-api>

2. Flutter-Chat-App

- Mobile App built to read, send messages.
- Uses Flutter as frontend framework, and socket.IO for connection handling.
- Shows users' online status and allows realtime messaging.
- Repo: https://github.com/Clumsynite/flutter_chat_app
